

Thank You

*As you read the final pages here
We wish you joy and peace, no fear
For we join together all as one
Women together to overcome*

*What burdens us and the world we see
Through our eyes how things might be
Our vision and purpose to uphold
The principles we bear are proud and bold*

*As "Pillars of the Party" we rise tall
Not just for us, but for one and all
Yes, we lead but not to rule
To unite and guide, is our goal*

*As we become the "Cornerstone"
Let's walk together, not alone
Building lives across the land
With one another, hand in hand*

*The "Foundation" is built, for all to see
Nothing will crumble to set us free
As equals - no matter what indeed
Our race, religion, gender, or creed*

*Our freedom – YES, we must strive for
But how did we ever get into this war?
One nation under God, our flag will wave
By land and sea and home of the brave*

*So, ladies, as we leave tonight
Remember our mission – we must not lose sight
Don't let others choose our fate,
We must stay strong as "Keystones of our State"*

*With thanks to ALL of you who have helped, I couldn't have done it
without you. God Bless You until we meet again....*
